Guide to Volumetric Weight:

If your parcel is large in size and light in weight, you may be charged for its volumetric weight rather than its actual weight. To calculate the volumetric weight use the formula below:

$$\frac{\text{Length} \times \text{Width} \times \text{Height (cm)}}{5000} = \text{Weight (kg)}$$

Parcel weight is rounded up to the nearest half kilo. The greater of the two weights will be used for the shipping cost.

Any customs duties or local taxes are payable by the consignee, unless shipper requests for a Free-Domicile.

All transactions are done as per the standard terms and conditions printed on the reverse side of the Shippers copy of our Air Way Bill.

A copy of our terms and conditions are available on request.

Cargo rates and spot rates for shipments weighing over 20 Kilos
